

TOWN FATHERS DECIDE TO BUY NEW FIRE ENGINE

The July meeting of the Gleichen town council was held recently. Mayor L. Brown, G. Jones, A. Gibbard and R. Hunter present. The minutes of the previous meeting were adopted on motion of T. Brown and R. Hunter.

A letter from the town of St. Mary's regarding the purchase of a new fire engine was read. The letter indicated that the fire fighting equipment they had was very satisfactory to that town and was giving excellent performance.

In a letter from the Saskatchewan Fire Insurance Co. of Saskatoon dated May 30th, 1945, it was stated that the price of the Fire Killer Engine was listed at \$13,500 f.o.b. Saskatoon and included in this price was three lines of discharge hose, each 100 feet long, two of which are 1 1/2 inch hose fitted with 1/2 inch nozzles and one 1 1/2 inch hose fitted with pipe nozzle. The pipe nozzle is used for inserting in walls or ceilings to get the gas in. Two lines of Fire Ducts and two lines of gas accompany the engine which will be mounted on a chassis with auto wheels and 21x34 1/2 tires or steel wheels, 16 inch, which will take 100 tons.

The council decided to introduce a by-law to purchase a fire engine of this type.

The matter of renewing the water mains was discussed at length. The question of the size of the mains was discussed. It was thought that if mains were to be used for the distribution of water to 100 manure only a three inch pipe would be sufficient but if hydrants were to be operated for fire protection then the size of pipe which the Fire Insurance Underwriters desired would have to be used. It was thought anything smaller than four inch main should not be used as there was criticism in connection with the portion of the main where a three inch pipe was used. The matter was left in the hands of the water works committee.

Signs prohibitive bathing in the irrigation lake had not yet been erected and it was decided to attend to as soon as possible.

The stop sign which seemed to be causing the most trouble was the one on Crawford Street by the McColl Frontage Garage. Several suggestions had been made at the previous meeting of the council but it has not yet been decided where the sign should be placed to the best advantage. The location of the present sign was thought to be in the way. Signs "Stop before entering the highway" were added. The councillors thought such a sign would be satisfactory.

The matter of grading and dragging the streets was the next matter brought up. Some of the streets were very rough and needed attention. Some had been graded with the government grader and were in fair shape except for the water mains. Some of the councillors suggested that the department of public works be approached with the object of obtaining the grader again. The matter was left in the hands of the public works committee to handle.

The by-law renewing the franchise with the Calgary Power Company had been read the first time at a previous meeting. As it had received the approval of the Board of Commissioners it was read a second and third time and passed.

The Crown Lumber Company made application for water service to their property in Block 13. It appeared there were two ways this service could be brought to the property. One from 4th Avenue from the water main located there which is approximately 300 feet away. The other way would be to hook on to the Irving Chas. Thompson's residence. This latter line was considered too small to carry this service.

A previous request made by the company in June 1944, they were advised that if they cared to undertake the installation of the water line themselves at their own expense, same might be arranged and they would be reimbursed in the form of property tax credit over a period of years. It was moved and carried that owing to the fact that no appropriations had been made for this purpose in the estimates the installation could not be undertaken, but that the offer made in the letter to them dated June 8th 1945 still stand if they care to undertake the installation.

It was moved an application for same connection. This was granted.

The police report for the month of June was then read. The report indicated that eleven complaints had been received during the month and these had all been investigated. Eight warnings under the town by-laws, and thirteen warnings under the Y. and H. T. Act had been given during the month. The doors of five business places in town had been found unlocked when making the night check-up.

Councillor A. W. Hart was re-appointed deputy mayor until the 13th of August, 1945.

HEAVILY PHRASES FOR POST WAR USE

Every so often some speech authority comes out with the five or ten most beautiful sounding words in the English language.

It isn't going to take any speech authority to decide what the most beautiful phrases of the post-war world are going to be. We'll all agree on those. How about:

Let her up.
Just charge and send it, please.
Is the roast beef rare water?
Send me a case please.

Remember when that used to be rational?
Send a taxi right away.

We're driving to the mountains for the week end.
Houses and apartments for rent. Experienced maid wants work. I told my butcher off this morning.

Water, will you bring me more better please.
The customer is always right.

I haven't canned since the war. January White Sale—Sheets, pillow cases, towels—drastically reduced. I ain't worth repeating.
Please. Thank you. I'm sorry, coming from those who serve the public.

I really shouldn't have a second place that chocolate whipped cream cake. But it is simply delicious. Beautiful phrases—aren't they.

THE ROAD AHEAD

The small building on the edge of town, one of the best structures I have seen for fitting returning veterans, writes the mayor of a small town in British Columbia. "But I would like to know what happens to the property if the veteran decides to resign? If a civilian buys it from him what terms would be satisfactory to the government? What guarantee has the veteran that his taxes will go up? Being a returned man from the last war myself, I am interested in these matters."

Well, Mr. Mayor, you've asked those questions and I'll try to answer them in the same order. But first, there's one thing which must be straightened out—until the veterans have lived on the small holding for two years and satisfactorily completed the terms of the contract, he has no right to the land at all. Before a veteran is settled on a small holding the Veterans' Land Act people try and make sure they're there to stay.

Now, suppose something unforeseen does happen and he has to leave in less than ten years. Since this has actually not happened yet, no clear policy on this line has so far been settled. If he wants to leave for good, however, the VLA takes over, sells the property, and if they obtain more than what it originally cost, then they will usually donate the balance to the veteran. If he wanted to rent it or sell it, and take another holding somewhere else, it is difficult to say at this time what course would be pursued by the director of the VLA.

Re the taxes—nothing can be done to keep them the same. The land chosen for small holding sites, however, is usually located in sections which, in the opinion of local business and real estate men, should not normally have a tax increase.

Even with every man, woman and child in Canada sugar conservation conscious, it is still the nearest thing in the world for Canadians to waste almost 11 tons of sugar a day.

A few grains are spilled, some is left undiscovered at the bottom of a tea cup, the almost empty cereal bowl holds a little. It all adds up. And how it adds up! If each Canadian family only wasted one teaspoon a day in ways like the above, that one family's teaspoon, multiplied by the millions of teaspoons of all the other families of Canada would come to 26,000 pounds of sugar or nearly 11 tons of sugar every single day. It is enough to make you look at your sugar ration with a magnifying glass.

22ND BATTERY LEFT SUNDAY FOR CAMP AT SUFFIELD

The 22nd Battery left by road with vehicles and guns on Sunday morning for two weeks training at the experimental station, Suffield, Alberta.

The local unit joined up with the batteries from Edmonton, Red Deer and Calgary at Bassano. (See page three) battery came from the east.

There are wonderful artists, mechanics and the station is the most complete and modern. The training should be good and interesting. Capt. House commanded the unit, and is assisted by Lieutenants Ronald Clark, Redmond and Woodcock. Thirty other ranks are attending.

LOCAL NEWS ITEMS OF THE TOWN AND DISTRICT

Jas. Black of Stober spent the week end in town visiting all his old pals. Mr. Black was manager of the Bank of Commerce here for some years before moving to Boon.

W.D. Bert Boon, R.C.A.P., returned to town on Sunday evening's train. Bert who was taken prisoner by the Germans after his plane was shot down spent almost three years in German prisoner of war camps and says he would have starved to death if it had not been for the Red Cross food parcels. Since being freed from the Germans and being properly fed looks to be in pretty good condition. Bert says his plane looks about good to him and feels that he never wants to leave the place.

Family allowance checks for many different families arrived in town last week. The pros and cons of the checks have been thoroughly discussed by the towns' people and have evidently been settled to the satisfaction of all.

Here is a piece of news, Sunday morning. Bert lost his equilibrium and fell into the swimming pool. Allen Quenell did likewise. The only damage suffered by either party was loss of dignity.

HELP ON THE FARMS

In spite of the fact that one half of our global war is over, there is still, and it is likely to be for the whole of this year, a serious shortage of labor on western farms. The hungry people of Europe, and almost all countries, are clamoring for food.

There are still great needs of food by our own and our Allies' Armed Forces. While we have plenty of food in United States and Canada, a shortage of livestock and livestock products, and it is these livestock products because of their high nutritional value that are needed most by the armed forces and by European people. The production of livestock and livestock products, as we all know, requires more labor than the production of grains alone. The amount of grains, therefore, that will be fed to livestock, and, consequently, the number of livestock, will be limited, at least, upon the labor available. The past war years have shown that students from our high schools and universities, during vacations, have helped in producing livestock products by working on our prairie farms. It is suggested that some of this year's students should consider making this same important and valuable contribution to Canada's war effort.

Life on a farm during the summer months is agreeable and interesting, and the work will not be found to be too hard.

The forest area of Canada now being used to produce pulp and newsprint for the United Nations is now used in the combined areas of the British Isles, France, the Netherlands, Denmark, Norway and Sweden.

A Canadian wire and cable firm played an important part in Operation Pluto, the amazing engineering feat of laying a pipeline under the English Channel.

Nickel, of which over 90 per cent of the world's supply is produced in Canada, is now mined from the ground by both open pit and mining methods. The chief use of nickel is called stainless steel.

VETERANS SKILLS INVESTIGATED BY COMMISSION

Canada's men and women in the armed forces have acquired new skills during the time they have served their country, and these new skills are going to contribute materially in the task of reconstruction that lies ahead. And that is where the Royal Commission on Veterans' Qualifications comes into Canada's rehabilitation setup. For it is the important task of the commission to see that the very most of these skills are made use of.

There is also the problem of co-ordinating educational courses taken by men and women while the service which are directly useful to those intending to pursue further education after discharge. These courses will not be overlooked by the commission for it is the commission will also confer with the universities and educational authorities on the subject of their reorganization.

Hon. Humphrey Mitchell, Minister of Labor, well aware that the commission faces a task which is a very important cog in the machinery of rehabilitation, has said that the industry proper account were not taken of this vocational training while in the armed forces.

The operation of trade unions and other groups with a responsibility or interest in the returning service man has been urged, and has been forthcoming.

Several interim recommendations of the commission have already been announced by Mr. Mitchell. One of these preliminary recommendations asked that the Department of Veterans Affairs at once take advantage of the new system of re-education centres established by the department of labor of the province of Quebec. This was complied with.

After observing that the practices varied as among the navy, army, and air force, the commission also recommended the issue of special documents upon discharge to all members of the armed forces indicating occupational and educational training obtained while in the service.

In this respect, the three defense departments have already undertaken the preparation of reports in covering all types of instruction given within the forces. One highly qualified officer from each service has been assigned to the commission as a technical adviser.

The commission also recommends that through the use of Canadian lexicon text books, by correspondence, and in classes, those in the forces both overseas and in Canada, should be assisted in securing matriculation or university entrance academic standing.

Another recommendation asks that the government start an aerial survey of Canada, and that the attention of the universities be directed to the desirability of instituting courses leading to the preparatory requirements necessary for clinical and engineering photographers.

Eying a present, and probable post war shortage of teachers in the Dominion, the commission suggests that the situation might be overcome by the training of selected instructional personnel from the three armed services. This, it also points out, offers work opportunities for veterans.

Impressed with the avenues of employment offered by industry in Canada to those especially fitted for present work, the commission suggests that many will be found among officers and other ranks of the services who have special aptitudes in jobs of this kind. These persons, it is stated, should be given helpful advice in regard to personnel work by counselors who are themselves veterans. The commission has recommended that universities and other educational institutions be invited to set up courses whereby the men picked for personnel work may be acquainted with civil requirements including modern theory and practice.

Twenty million dollars were divided among one and a quarter million Canadian mothers on July 15 of this year.

Seventy per cent of the world's supply of asbestos, the non-inflammable mineral of a thousand uses, produced in Canada.

DDT, the new super-chemical insect killer, is now being produced in Canada.

FARM IMPROVEMENT LOANS

● Under the Farm Improvement Loans Act a farmer may now borrow on special terms to buy agricultural implements, livestock or a farm electric system, and for fencing, drainage, repairs to buildings or other farm improvements.

This Bank is fully equipped to make loans to farmers under the provisions of this Act.

KELLOGG'S ALL-BEAN CORN FLAKE CEREAL

SAVE TIME AT ANY MEAL, ANYTIME!

Busy housewives appreciate Kellogg's ready-to-eat cereals more and more every day. Kellogg's are a satisfactory dish anytime—for breakfast, lunch, odd-hour snacks. Ready in 30 seconds.

It's whole wheat—flaked, toasted—ready-to-eat!

Save Time... Save Work... Save Fuel!

BOYS! GIRLS! They're free...
8 Colored Cards in every package. Save 'em! Trade 'em!

Price Control And Rationing Information

Q—Would it be possible to get some extra sugar and a little butter in order to prepare food for a club affair which is held to raise money for charity?

A—No extra rations are allowed for functions of this type. It will be necessary for the club members to buy rationed articles with coupons from their own ration books.

Q—I do not put up my own preserves. Can I use the rationing coupons to buy commercially prepared preserves?

A—Certainly. Any preserves coupon may be used to purchase any allowed quantity of commercial preserves, jams, jellies, marmalades or other foods which may ordinarily be purchased with preserves coupons.

Q—Are public eating places allowed to serve poultry and fish on "meatless days"?

A—Yes. Public eating places across Canada are allowed to sell poultry and fish on Tuesdays and Fridays, which are the two "meatless days." Canned pork and beans or kitchen-prepared dishes of pork and beans, which contain strips of bacon cannot be served on these two days.

RURAL BUILDING NEEDS ARE IGNORED

The building supply needs of rural residents were stressed in a brief presented by a delegation from the Western Retail Lumbermen's Association.

The delegation consisting of E. W. Stacey, Manager of Beaver (Alberta) Lumber Limited, of Edmonton, President of the Association, and H. Steinthorson, Asst. General Manager of the North American Lumber and Supply Co. Ltd., Winnipeg, a Director, in their discussions with top-ranking government officials, pointed out that the operations of such Crown companies as Wartime Housing Limited, merely resulted in a concentration of materials and labor in the hands of government agencies, without producing any housing activity. Further, that these agencies were operating in cities only whereas 65% to 75% of the Prairie population is rural, and under present conditions, is largely deprived of any opportunity to build urgently needed homes. Homes are needed in the west for returning war veterans, and to settle in their home communities, for farmers and other rural residents.

The section of the brief dealing with this phase of the subject reads as follows:

"The operations of Wartime Housing Limited are confined to cities, and this is probably due to pressure on the part of city authorities. Supposedly houses presently being erected would be available for rent to war veterans."

"Actually, so far as the Prairies are concerned, something near 65% of the personnel of the armed forces came from the farms, villages, and towns, and presumably will want to return to their home communities. What chances have they to provide themselves with homes, with no rental money available? Yet, they want to build their own homes as they want them, and where they want them, should come high up in the order of priority. They come nowhere today."

Proved on the Speedway

Firestone Tires

100 miles per hour!

SYNTHETIC RUBBER

EACH YEAR before the war, more than 150,000 people thronged the Indianapolis Speedway to witness the supreme test of tire mileage and safety, the annual 500-mile race.

Recently, under the supervision of the American Automobile Association, Wilbur Shaw drove the 500-mile course at an average speed of 100.34 miles per hour in a race car equipped with STOKC Firestone synthetic rubber tires, the same as you can buy at any Firestone store.

Imagine the punishment those tires took as they pounded over the roughest brick and grinding asphalt... 500 miles at speeds up to 115 miles per hour... a total of 50,000 miles of ordinary travelling.

When you buy new tires, remember Firestone are the only synthetic rubber tires that are safety-proof on the speedway for your protection on the highway.

WARNING: The tire situation is still critical. You should continue to observe the tire situation and all other fundamental precautions for ensuring the tire that are now on your car.

Science And Peace

DURING THE PAST CENTURY there has been great progress in the field of science and invention, and this progress has profoundly influenced the course of history. In the realm of communications alone, modern inventions have so greatly shortened the distances between cities, nations and continents, that it has been necessary to revolutionize our ideas on trade and commerce, foreign relations and many other questions. Developments in agriculture, medicine, electricity and other branches of science and engineering, have likewise had far-reaching effects on our social and economic life. Mechanical and scientific knowledge are important in modern warfare and during the two great wars fought in this century, scientific progress has been greatly accelerated to meet the needs of the times. Much of the knowledge gained through intensive war research has peacetime uses, but of necessity much time and talent must be directed to creating forces of destruction.

Germans Tried For Leadership

It was they who introduced gas warfare during the First World War, and it was they who inaugurated mass air attacks on cities, and the deadly "V" bomber. Since the end of the fighting in Europe, it has been revealed that the war lasted a few months longer, other and even more destructive weapons might have been brought into use. German laboratories are now being systematically destroyed, and if the Allied nations adhere to their present policy, German scientists will never again be in a position to produce for war. Only one hundred years ago, Germany was the acknowledged leader in the field of science, and students from all parts of the world went to study at the German universities. This leadership continued for over fifty years, and many of the outstanding scientists of this and other countries received their training there.

One Hope For Future Peace

Because of the ways in which the Germans put the work of those scientists who remained to collaborate with the state, Germany has now lost all prestige in the world of science. In other words, however, we look to the future, we look to progress in many fields. It is realized everywhere that upon the creation of new industries and the discovery of new uses for agricultural products and natural resources, lies one hope for the prosperity and security in the future. In this, however, as in many other matters, the lessons of the past have taught us the importance of working and thinking internationally, not nationally. The late President, Roosevelt, in one of his last speeches, delivered to a group of American scientists, said: "Today science has brought all the different quarters of the globe so close together that it is impossible to hate them, one from another. Today we are faced by the pre-eminent fact that civilization is to survive, we must cultivate the science of human relations, the ability of all peoples, of all kinds, to live together and work together, in the same world, at peace."

Q—Is it necessary to advise the Wartime Prices and Trade Board if one has a couple of school girls next fall and give them board and room? A friend of mind told me I would have to obtain a license.

A—It is not necessary to obtain from Wartime Prices and Trade Board a license to operate your boarding and rooming house.

Please send your question or your request for the pamphlet "Consumers' News" or the Blue Book in which you can keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

SMILE AWHILE

Angry Father—What do you mean bringing me a chicken now at three o'clock in the morning?

Young man—Well, I have to be at work at seven.

Stereotype—Good news, you've been owing me this bill for a year. I'll meet you half way. I'm ready to forget half of what you owe me.

Customer—You need yes. I'll forget the other half.

"As a farmer," said Farmer Smith, "I claim to have a valuable hen. I crossed a parrot and a hen and as a result I have a chicken now that not only lays an egg, but also says 'Come and get it.'"

She: "It is disgraceful! Yesterday you kissed me against my will and today you try to repeat the performance!"

He: "Well, a criminal always returns to the scene of his own crime."

Business Man: "I had a surprise this morning. I had an anonymous note and in one of the pockets found a big roll of bills which I had entrusted to my secretary."

Peasant: "Were any of them receipted?"

When Smith walked into his friend's office he found him looking very depressed.

"Old man," said Smith, "what's up?"

"Oh, just my nephew," replied the other sadly. "She's engaged a new secretary for me."

"Well, there's nothing wrong about that. Is she a blonde or a brunette?"

"There's a lot wrong. He's laid."

Bridegroom (in poetic mood as they stroll along the ocean): "Roll on, thou deep and dark blue ocean!"

Bride: "Oh, Gerald, how wonderful you are! It's doing it."

Doctor: "Only members of the family may see him. Are you a family member?"

Girl: "Oh, yes, indeed. I'm his sister."

Doctor: "So kind to meet you. I'm his father."

Teacher—Now, Junior, how many seasons are there?

Junior—Do you mean in Canada. Teacher—No, certainly.

Junior—Two.

Teacher—Only two? Name them.

Junior—Baseball and hockey.

Ill-Fated Voyage

Franklin Expedition, To Be Honored By A Suitable Ceremony

In 1945 the Arctic knew its greatest tragedy with the disappearance of the Franklin Expedition and in the year the ill-fated British sailors will be remembered and honored in the region where they were lost.

Resources Department officials said that the Eastern Arctic patrol, travelling on the supply ship Nasik, will commemorate the 75th anniversary of the expedition by a "suitable ceremony" when the Nasikope is at a point near Beechey Island, where, a century ago, the sailing ships spent the winter.

In 1845, Sir John Franklin with his two ships, "Erebus" and "Terror," sailed from England in search of a northwest passage and anchored at Beechey Island. Later, the expedition was caught in the ice and all hands perished—Ottawa Journal.

HAVE HARDER JOB

The Ottawa Citizen says: "Weekly Newspaper Editor Reaches Age of 85." And is doubtless as spry as one on a daily at 45. But we'll say that on the daily fellows, that they have to shoulder the world's woes six times as often. And that kind of a load is no armful of nose-stuffing. It is more of a nod of brick.

An ancient invention patented in the British Kingdom was used as a machine gun that shot round bullets at Christian enemies and square bullets at heathens.

The Mail Goes Through—

Human interest is handled by the ton at the Base Post Office of the Canadian Army in Ottawa, where approximately 25% of the personnel are members of the Canadian Women's Army Corps. All parcels and

Lighter Than Air

Would Fill Pneumatic Tires With Helium On Airlines

Pneumatic tires on a forthcoming giant airliner will be filled with 20 pounds of helium instead of 180 pounds of air which would normally be required for the job.

The net weight (not pressure) saving of 154 pounds will increase the available payload of the craft by exactly that amount.

Helium, being an inert gas that has no known chemical affinity for natural or synthetic rubber, should provide an extra dividend in a long tire life.—Business Week.

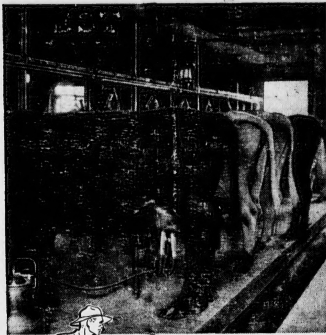

Zacharius Invenor invented first compound microscope about 1600.

HOW YOU CAN GET QUICK RELIEF FROM SORE, PAINFUL PILES

Most people seem to think the only way to get relief from their painful piles is to have surgery. But there is a better way. You can get relief from your piles in a few days by using Hem-Hoid. Hem-Hoid is a powerful, yet gentle, remedy that relieves the pain and itching of piles. It is a natural product that does not irritate the skin. It is a safe and effective remedy for all types of piles, whether internal or external. It is a must-have for anyone who suffers from this painful condition.

Lower bowel the painful piles soon heal over having the sensitive rectum free from irritation. Hem-Hoid is a powerful, yet gentle, remedy that relieves the pain and itching of piles. It is a natural product that does not irritate the skin. It is a safe and effective remedy for all types of piles, whether internal or external. It is a must-have for anyone who suffers from this painful condition.

NOTE: This preparation is a powerful, yet gentle, remedy that relieves the pain and itching of piles. It is a natural product that does not irritate the skin. It is a safe and effective remedy for all types of piles, whether internal or external. It is a must-have for anyone who suffers from this painful condition.

STOP MILK LOSSES
with STANCO Livestock spray

Biting flies and insects can cut your milk production—and your profits! Stanco Livestock Spray stops all that—repels flies, mosquitoes and other insect pests—keeps cows quiet during milking—more than pays for itself in extra milk profits!

Stanco Livestock Spray is both a good repellent and a long lasting spray. Use it to protect your milk production.

WAR DOLLARS

DO THREE ESSENTIAL JOBS:

- 1. HELP CARRY ON THE WAR—**
Every possible dollar will be needed to bring the war to a successful conclusion. **THEREFORE**, every dollar you lend enables you to play a vital part in the great fight for freedom.
- 2. CURB WASTEFUL SPENDING—**
To retard spiralling prices and rises in the cost of living income must be diverted from unwise purchases and made available for war use. **WAR SAVINGS** mean money put aside to aid essential war production.
- 3. PROVIDE A NEST EGG—**
Following every major war, there is a period of economic re-adjustment. The man who has taken his share of **WAR SAVINGS** will find this money very useful during this transition period.

A method of extracting vanadium from iron ores is the discovery of an engineer of the National Research Council of Canada.

Fulkens, the system of physical and mental classification used by the Canadian Army, has been of great value in personnel selection.

Town & District

A fare well picnic in honor of Mr. and Mrs. Jack Webb was held at the river south west of town Sunday. There was a very large number of friends present and during the afternoon the guests of honor were presented with a trilliant lamp by Mr. W. Cook on behalf of the assembled friends. The afternoon was spent in various games which included two games of softball. Mr. and Mrs. Webb have been residents of Gleichen for some years. Mr. Webb had charge of the U.G.O. elevator until he was promoted inspector about three years ago. As Calgary is more central for him in his new occupation he has decided to move there and will do so in a week or so time. He took a great interest in curling and the local club will certainly miss him next winter.

That it pays to have a caretaker at the swimming pool every minute once the gate is open to the public, was demonstrated the other day. A little fellow in his enthusiasm evidently forgot himself, jumped into the pool clothes and all, at the shallow end, only to find the water was over his head. Shouts from the other children brought the caretaker, Mr. Kempf, who was seated on the opposite side of the pool, to the scene. The child was taken out none the worse for the ducking. The wee tot's pool is now in full operation and the little folks seem to have more fun in it than the larger people do in the bigger pool.

Several local boys were engaged send a dog to happy hunting grounds. And here is the story as we put it which we do not vouch for. They tied a rope around his neck and pulled him up on the limb of a tree. The rope broke. Again they strung him up and again the rope broke. They then took a wire and put it around his neck, twisting it tight choked him to death. These boys must have been reading tales of the early days when criminals were put to death that way.

The Indians at South Camp are going to hold a sports day on the river flats below the historical monument three miles south of Cluny, Wednesday afternoon August 16. They have drawn up a program of sports that should be of interest to all during the afternoon. On the race track there will be several different kinds of horse races. There will also be sports for children. Refreshments will be served and everybody is invited to bring along their picnic baskets.

Housewives budgeting this year's allotment of cooking sugar are looking into the Canadian fruit basket to estimate the best fruits for their use. According to the Dominion Bureau of Statistics this year's grape harvest will be the third largest in history, but the apple crop is just about half what it was a year ago. Small fruits are above their average production, including strawberries, raspberries, grapes, B. cherries and apricots. Weather has played havoc with the large tree fruit crop in eastern Canada, reducing the number of peaches, plums, prunes, pears and cherries. The overall cherry crop is less than it was a year ago, although British Columbia cherries topped those of last year. On July 10, ten preserves coupons were valid for the purchase of five pounds of sugar for canning. Two preserves coupons declared valid for this purpose on March 15 and eight on May 17 now total the complete 20 coupons good for the full allotment of 10 pounds of sugar for canning. Preserves coupons are good for the alternative purchase of half a pound of sugar instead of the regular preserves ration.

Whey, formerly used only as swine fodder, is now being employed in Canada as a source of milk sugar for the manufacture of peccolins.

Five of the 10 wooden microwave ovens being supplied to Russia by Canada have already been launched, while the other five are on the ways. Magnesium, extensively used in the aircraft industry, is produced from dolomite by a process developed by Dr. J. P. Pigeon of the National Research Council of Canada.

One of the most exhaustive geological surveys ever attempted in any country is being carried out by Geological Survey of Canada, now over a century old.

A spot in the St. Lawrence River on Canada's east coast where fresh river water met salt ocean water, was a favorite lurking place for U-boats. In this area, sub-detecting devices did not function with maximum efficiency.

Canadian Army doctors have found that a high-protein milkshake, fed in their favorite flavor to U-boats, caused their poisoning.

FROM CANADA TO CALCUTTA

Your bank is a link between the man
in Canada who has goods and services
to buy or sell, and his customers abroad.

The business of your bank is not all done in dollars and cents. It renders valuable service to Canadian business in the far-off market places of the world, overcoming the obstacles of strange currencies, be they pesos or piasters, escudos or rupees.

Through its commercial correspondents and business connections all over the globe, your bank often has the specialized information necessary to bring buyer and seller together, no matter how far apart they live.

Your bank is able to gather information on the reliability of foreign firms, to handle letters of credit, to arrange the complicated exchange of funds, performing an individual, intricate and inexpensive service to importers and exporters alike.

The features of Canadian banking has a direct bearing on your welfare. It has, through many years, developed the sale of Canadian goods abroad, resulting in more jobs for Canadian men and women.
